White alone	259	3.1
Black or African American alone	29	0.4
American Indian and Alaska Native alone	3	0.0
Asian alone	0	0.0
Native Hawaiian and Other Pacific Islander alone	0	0.0
Some Other Race alone	178	2.2
Two or More Races	54	0.7
Not Hispanic or Latino	7,736	93.7
White alone	5,177	62.7
Black or African American alone	2,293	27.8
American Indian and Alaska Native alone	18	0.2
Asian alone	87	1.1
Native Hawaiian and Other Pacific Islander alone	5	0.1
Some Other Race alone	16	0.2
Two or More Races	140	1.7
RELATIONSHIP		
Total population	8,259	100.0
In households	8,186	99.1
Householder	3,191	38.6
Spouse [6]	1,768	21.4
Child	2,325	28.2
Own child under 18 years	1,539	18.6
Other relatives	542	6.6
Under 18 years	255	3.1
65 years and over	96	1.2
Nonrelatives	360	4.4
Under 18 years	39	0.5
65 years and over	21	0.3
Unmarried partner	160	1.9
In group quarters	73	0.9
Institutionalized population	73	0.9
Male	18	0.2

Subject	Number	Percent
Female	55	0.7
Noninstitutionalized population	0	0.0
Male	0	0.0
Female	0	0.0
HOUSEHOLDS BY TYPE		
Total households	3,191	100.0
Family households (families) [7]	2,254	70.6
With own children under 18 years	864	27.1
Husband-wife family	1,768	55.4
With own children under 18 years	649	20.3
Male householder, no wife present	132	4.1
With own children under 18 years	55	1.7
Female householder, no husband present	354	11.1
With own children under 18 years	160	5.0
Nonfamily households [7]	937	29.4
Householder living alone	786	24.6
Male	333	10.4
65 years and over	97	3.0
Female	453	14.2
65 years and over	239	7.5
Households with individuals under 18 years	1,005	31.5
Households with individuals 65 years and over	936	29.3
Average household size	2.57	(X)
Average family size [7]	3.06	(X)
HOUSING OCCUPANCY		
Total housing units	3,387	100.0
Occupied housing units	3,191	94.2
Vacant housing units	196	5.8
For rent	37	1.1
Rented, not occupied	1	0.0
For sale only	67	2.0
Sold, not occupied	4	0.1
For seasonal, recreational, or occasional use	9	0.3
All other vacants	78	2.3
Homeowner vacancy rate (percent) [8]	2.4	(X)
Rental vacancy rate (percent) [9]	7.4	(X)
HOUSING TENURE		
Occupied housing units	3,191	100.0
Owner-occupied housing units	2,727	85.5
Population in owner-occupied housing units	7,134	(X)
Average household size of owner-occupied units	2.62	(X)
Renter-occupied housing units	464	14.5
Population in renter-occupied housing units	1,052	(X)
Average household size of renter-occupied units	2.27	(X)

X Not applicable.

[1] Other Asian alone, or two or more Asian categories.

[2] Other Pacific Islander alone, or two or more Native Hawaiian and Other Pacific Islander categories.

[3] One of the four most commonly reported multiple-race combinations nationwide in Census 2000.

[4] In combination with one or more of the other races listed. The six numbers may add to more than the total population, and the six percentages may add to more than 100 percent because individuals may report more than one race.

[5] This category is composed of people whose origins are from the Dominican Republic, Spain, and Spanish-speaking Central or South

American countries. It also includes general origin responses such as "Latino" or "Hispanic."

[6] "Spouse" represents spouse of the householder. It does not reflect all spouses in a household. Responses of "same-sex spouse" were edited during processing to "unmarried partner."

[7] "Family households" consist of a householder and one or more other people related to the householder by birth, marriage, or adoption. They do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same-sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption. Same-sex couple households with no relatives of the householder present are tabulated in nonfamily households. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

[8] The homeowner vacancy rate is the proportion of the homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, vacant units that are "for sale only," and vacant units that have been sold but not yet occupied; and then multiplying by 100.

[9] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units "for rent" by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

SELECTED ECONOMIC CHARACTERISTICS

2007-2011 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Unrelated individuals 15 years and over	(X)	(X)	14.9%	+/-9.1

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Census occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC). The Census occupation codes for 2010 and later years are based on the 2010 revision of the SOC. To allow for the creation of 2007-2011 and 2009-2011 tables, occupation data in the multiyear files (2007-2011 and 2009-2011) were recoded to 2011 Census occupation codes. We recommend using caution when comparing data coded using 2011 Census occupation codes with data coded using Census occupation codes prior to 2010. For more information on the Census occupation code changes, please visit our website at <http://www.census.gov/hhes/www/oi/index/>.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2007-2011 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

All sectors: Geographic Area Series: Economy-Wide Key Statistics: 2007

2007 Economic Census

The data in this file come from separate 2007 Economic Census Industry Series, Geographic Area Series, and Summary Series data files, as well as data files from the 2007 Economic Census of Island Areas and the 2007 Nonemployer Statistics. These files are released on a flow basis from March 2009 through mid-2011. The national data are subject to change; they will be replaced when updated data are added from the Geographic Area Series and Summary Series in 2010 and 2011. The first 4 data fields are for establishments of firms with payroll (employers), and the last 2 data fields are for establishments of firms with no paid employees (nonemployers). For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology [pdf].

N Not available or not comparable

D Withheld to avoid disclosing data for individual companies; data are included in higher level totals

a 0 to 19 employees

b 20 to 99 employees

c 100 to 249 employees

Universe Description

The universe of this file is all operating establishments with one or more paid employees. This universe includes all establishments classified in the North American Industry Classification System (NAICS) Codes 21 through 813990.

Data Items

This file contains data on:

- Number of employer establishments
- Sales, receipts, revenue, shipments, or value of business done for employer establishments
- Annual payroll of employer establishments
- Total employment of employer establishments
- Number of nonemployer establishments
- Receipts for nonemployer establishments

Note: The inclusion of the data for nonemployer establishments (establishments with no paid employees) is new for the 2007 Economic Census *Economy-Wide Key Statistics* data file.

Geographic Coverage

The data are shown for employer establishments at the US, State, Combined Statistical Area, Metropolitan and Micropolitan Statistical Area, Metropolitan Division, Consolidated City, County (and equivalent), and Economic Place (and equivalent; incorporated and unincorporated) levels for the U.S. and the Island Areas. Data for nonemployer establishments are shown for the U.S. for all levels except for Economic Places and only for Puerto Rico for the Island Areas. New for 2007 are unincorporated places (Census Designated Places) in the U.S..

Industry Detail

The data are shown at the 2- through 6-digit NAICS code levels for all Economic Census sectors and at the 7- and 8-digit NAICS code

levels for selected Economic Census sectors.

Other Variables Identifying Records

For the Wholesale sector, data are published for Total Wholesale Trade and for Merchant Wholesalers. For the Services sectors, data are published for All Establishments, as well as Taxable and Tax Exempt Establishments.

Release Schedule

The data in this file are scheduled for release starting in March 2009 and ending in August 2010.

Related Data Files

Additional statistics not shown in this file are available in the Industry, Geographic Area, Subjects, and Summary Series files released for each sector within the Economic Census for the U.S. Additional statistics not shown in this file are also available in the Geographic Area Series data files released from the Economic Census of Island Areas.

Data Limitations

Data are shown for selected industries following cutoffs that vary by state, metropolitan and micropolitan area, county, and place. Also, see Survey Methodology for additional information on data limitations.

File Sequence

Data are presented in ascending geography (GEO_ID) by NAICS code (NAICS2007) sequence.

Estimated File Size

Approx. 400 MB

Source: U.S. Census Bureau, 2007 Economic Census, 2007 Economic Census of Island Areas, and 2007 Nonemployer Statistics.

Note: The data in this file are based on the 2007 Economic Census, and the related programs listed above. To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this file contain sampling and nonsampling error. Data users who create their own estimates using data from this file should cite the Census Bureau as the source of the original data only. For the full technical documentation, see Survey Methodology link in headnote above.

DP02

SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2007-2011 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
